

Global Learning

Here at St Anthony's we teach both History and Geography under the branch term of Global Learning. Teaching staff have contributed in planning a bespoke Global Learning curriculum that allows children to obtain the necessary skills and knowledge in a well sequenced manner which includes links across the curriculum.

Geography

In Geography, developing a sense of place and location through using our local environment, taking part in residential activities and school visits, helps to expand our children's geographical skills. We believe rather than just teaching the children the knowledge and skills in the subject, they should experience it first hand to become established members of their community who have an awareness of local, national and global issues and feel empowered to make a difference.

History

In History, we develop children's ability to ask pertinent questions about the past, analyse evidence, think critically, appreciate different perspectives and develop informed judgements. Our children experience a range of local, national and global history in a carefully planned and sequenced manner, ensuring that they leave our school with the necessary knowledge and skills to progress as individuals.
