

Design and Technology

Our design and technology units are based upon the 'D&T associations' scheme of work which supports us in providing opportunities for children to develop their capability, combining their designing and making skills with knowledge and understanding in order to create quality products. This has then been individually designed to meet the needs of our children and to link where appropriate to yearly topics. Through a variety of creative and practical activities, pupils are taught the knowledge, understanding and skills needed to engage in the process of designing and making.

Units also focus on cooking and apply the principles of nutrition and healthy eating.
